BUCKET ELEVATOR JAM REMOVAL			

Job Safety Analysis	Job: Bucket Elevator jam removal	Date:20/07/2012	Analysis by: Salihamin	Reviewed by: Y.V.N.Sai
Title of employee doing job: Shift fitter	Supervisor: Shift Engineer / Section Engineer	Department: Operation / Mechanical	Section: Applicable for All Bucket Elevators.	Approved by: Mohamed Ali

Req'd/recommended PPE:

Sequence of Basic Job Steps	Potential Hazards	Recommended Safe Job Procedure	What Could Go Wrong	Corrective Action
Open the inspection doors.	Material may flush from inspection door.	Don't stay in front of the door during opening	1) Door may open suddenly / forcedly. 2) Material may be in hot condition.	1) Keep some bolts at loosen condition to hold the door until the material flush. 2) Prevent by using proper Hand gloves & leg guards
Clear The Jam Discharge Chute / Boot	Mild rotation / movement of Buckets during cleaning	Use Proper Tools	Material may flush(if it fines)	Attend cleaning activity from sides(make way to escape if required)
Boot cleaning	Material may spill from top	Don't enter in to the Boot	Insufficient access to clean entire Boot	Use long handled Shovels (similar tailor made Tools)
Empty out the elevator	Dust may spared all around	Keep all the doors in close condition before emptying)	-Nil-
