### Step - 1

Requestor must fill out all the mandatory fields before submitting the permit request. If any required field is left blank, the system will display an error message, alerting the requestor to complete all mandatory inputs.

**Note :** When initiator raise the new permit, we will check the Latitude and Longitude range of his current location to the selected zone. In case, if its out of range, system throws the error message and prompt the user to change the status to "Draft".

Furthermore, if the user holds the raised permits without taking any action, the system will display an error message and prompt the user to fulfill the existing permits.

#### Step - 4

#### Responsible Person : Initiator

From the "In Progress" stage, there are three options to move the permit forward.

**Completion** – This likely signifies that the permit is finished and can be finalized.

**Cancellation** – This option would stop the permit process entirely.

**Extension** – This allows for more time to work on the permit before moving forward.
