Issue No. 01	Rev. No: 00	Effective Date: 01.11.2010	WI-13 (SP-8; AM-7)
Issued By: M.R		Approved By: HOD-INSTRUMENTATION	
CALIBRATION PROCEDURE FOR DP & FLOW PRESSURE TRANSMITTER			

The Instrument engineer takes action' as follows, for calibration:

- 1.1 Connect the transmitter to DTM through ABB DCS.
- 1.2 Keep open both high side and low side tappings incase of pressure or draught transmitter to the atmosphere and check for zero. If not, adjust it by 'zero alignment' in DTM menu.
- 1.3 Connect the Pressure calibrator/vacuum pump to the either side of the tapping's (high/low tapping) of the transmitter.
- 1.4 Apply the pressure corresponding to the maximum range of transmitter. Read the reference Value in process value field, If it doesn't match, adjust it by high balance point in DTM \ menu.
- 1.5 Record the observations in the instrument calibration format F-1/W-13(SP-8; AM-7)

**2.0 CONNECTED DOCUMENTS:**

F-1/W-13(SP-8; AM-7) Calibration of DP & Pressure transmitter.
